

Channel Network Conference 2023

August 23 – 25, 2023

Wageningen

The Channel Network Conference (CNC) is a biennial conference organized by the International Biometric Society (IBS) channel network. The channel network comprises the Belgian, French, British & Irish, and Dutch regions of the IBS. This conference gathers statisticians, mathematicians, and data scientists to discuss the latest methodology for the analysis of data in the biosciences, including agriculture, biomedical science, environmental science, and allied disciplines. It is a 3-day conference with short courses, invited and contributed sessions. The 2023 edition of the CNC will be hosted in lovely Wageningen, the Netherlands, from August 23 to August 25.

The call for contributed abstracts is now open. As for all IBS conferences, contributed abstracts for both oral and poster presentations are welcome across the wide range of methodological topics and application areas pursued by society members. A non-exhaustive list of common topics is provided within the [online abstract submission system](#). Prizes will be awarded to best student oral and poster presentations. All conference information can be found at: cnc23.sciencesconf.org.

The deadline for abstract submission is 15th of May 2023. Contributors will be notified in June. Early bird registration closes July 1st.

We look forward to seeing you in Wageningen!

Carel F.W. Peeters & Jos Hageman (Chairs Local Organizing Committee)
Olivier Thas & Pierre Lebrun (Chair and co-chair Scientific Committee)
